

Short bio Michele Marini

Michele Marini is a second Master's Degree candidate in Environmental and Resource Management (ERM) at the VU University of Amsterdam (2016). He is currently engaged in a thesis that regards the environmental effects of Mediterranean greenhouse cultivation as agricultural land use change under the supervision of Professor Jasper van Vliet and Post-Doctoral researcher Žiga Malek – VU University.

He holds a Bachelor's Degree in Economics of Development and a Cum Laude Master's Degree in International Studies received at the University of Siena in 2014. His final thesis concerned Carbon Markets and the New Market based Mechanisms (NMMs).

In 2015 he worked as a research assistant at the University of Siena for a research project on Climate Change in the Mediterranean Area (PRIN) under the supervision of Professor Simone Borghesi.

Since 2015, he is a researcher in the research group Regulation for Sustainability (R4S) and student member at the Institute for Environmental Studies (IVM) of Amsterdam.

His main fields of academic interests are Mandatory and Voluntary Carbon Markets, Renewable Energy, Environmental Policy, Environmental Geography, Spatial Analysis.
